DEWA P-C

"Mini" Belt Filter Press

The DEWA P-C "Mini" sludge dewatering unit is ideal for small scale sludge dewatering applications in both municipal and industrial treatment plants. This compact twin belts design has a small gravity drainage section followed by wedge and pressing sections.

The best possible materials, the stainless steel frame and rollers make it robust, reliable and long lasting. 3 standard belt width alternatives from 0,7m to 1,6m are available. P-C "Mini" is the most economical choice for applications with low throughput requirements.

DEWACO is a resource for both industrial and municipal applications, assisting in the design, manufacturing and installation of complete sludge dewatering and sludge removal systems. DEWACO successfully facilitates clients by providing them with technically proficient, cost-effective solutions. With decades of experience and technical expertise, DEWACO understands what technology is appropriate to each and individual application. From individual components to complete sludge treatment systems, DEWACO is committed to serve you with unparalleled support and uncompromising quality.

P-C CAPACITY TABLE

MODEL	P-C 7	P-C 11	P-C 16
Belt width mm	70	110	160
Effective filtrate area m ²	3.3	5.3	7.5
Sludge flow m ³ /h	0.5-4.0	3.0-7.0	6.0-10
DS capacity kg DS/h	50-150	100-250	200-400

P-C DIMENSION TABLE

MODEL	P-C 7	P-C 11	P-C 16
Length mm	2150	2150	2150
Width mm	1350	1750	2250
Height mm	1650	1650	1650
Weight kg	700	900	1200
Power kW	0.37	0.37	0.55

DEWACO has the rights to modify these specifications

NOTE : The dimensions are given without filtrate tray and mounting bed

Advantages

- Economical, compact and requires a minimum space
- High quality corrosion-free materials and components
- Easy to operate
- 3 standard belt widths
- Integrated gravity section
- Wide range of applications both municipal and industrial
- Low energy consumption
- Customer satisfaction guaranteed

Over 25 years experience in Sludge Treatment Technology
